

NAVIGATING WEBCOURSES

THE DASHBOARD

The Dashboard is where you can see an overview of your classes and assignments. You can see your upcoming assignments on your To-Do list and any recent grade changes or announcements.

CALENDAR

The calendar lists any upcoming assignments. Once an assignment is complete it will be crossed out on your calendar. There is also a function (the + sign) to add things to your calendar if there is anything not listed that you want to keep track of. This is a great tool to keep track of assignments!

MESSAGES AND ANNOUNCEMENTS

The inbox tool can be used to communicate with your classmates, professors, and TA's. Most professors prefer that you communicate with them through this function. For each of your courses, there is an announcement tab where you can see important information from professors.

COURSES

This is where you will find all of the information for your classes. On each class page there are different tabs for different aspects of the classes, such as assignments, syllabus, modules, etc. Some classes will have assignments and requirements listed for the entire semester, others will have information update weekly.

GRADES

Each class has a tab where students can see their grades. You can see the grades for each assignment and your overall grade for the class. You can also input grades in ungraded assignments to see possible overall grade changes.

CUSTOMIZATIONS

You can customize the webcourses dashboard to fit your personal preferences and style! You can choose either list view or card view for the courses on your dashboard. The colors and names of your courses can also be changed to whatever you prefer.
