**Angela M. Alban**

President and CEO of SIMETRI

Angela M. Alban, president and CEO of SIMETRI, started SIMETRI in 2009. Angela began her career as an engineer after graduating from Emory University with a Bachelor of Science degree in mathematics and computer science and completed a Master of Science degree in computer engineering from the University of Central Florida, while working professionally in the modeling and simulation industry and completing the Defense Systems Management College Advanced Program Manager's Course at Fort Belvoir.

Angela transitioned into management in 2004 when she was appointed as the vice president and chief operating of a foreign-owned subsidiary. After growing Indra's presence in the United States, she decided to start her own business, and has spent her 25 years of professional experience in the simulation and training industry. SIMETRI has allowed Angela to meet her aspirations of growing a technology firm from the ground up, while nurturing a strong and innovative culture that embraces family life and community involvement.

Along with her family and her business, Angela is very committed to the Central Florida community, and has dedicated herself to several special causes. Team SIMETRI frequently supports various community non-profit organizations across the community to include UCP of Central Florida, Samaritan Resource Center, Embrace Families, and the Early Learning Coalition of Central Florida. Angela is an active board member of the Orlando Economic Partnership, Orlando Regional Chamber of Commerce, UCP of Central Florida, National Center for Simulation, University of Central Florida College of Engineering and Computer Science Dean's Advisory Board, Entrepreneurs Alliance of Orlando Advisory Board, and Florida First Robotics Executive Advisory Board.
